Beyond the Export Administration Regulations: an Export Controls & Compliance Seminar

**Tuesday · September 26, 2006 · 8:00 a.m. – 4:30 p.m.
Lockheed Martin · 4800 Bradford Drive · Huntsville**

This seminar will provide an overview and update on the export controls from the U.S. Department of State, U.S. Department of the Treasury, and the U.S. Department of Commerce. Officials from each agency will outline current issues pertaining to their respective regulations, including the International Traffic in Arms Regulations (ITAR), Office of Foreign Assets Control (OFAC), and enforcement of the Export Administration Regulations (EAR). Companies that export dual use or defense-related products, services, or technology – or those just entering the export field – will benefit from this discussion on issues faced when dealing with **Export Controls & Compliance**.

Who should attend? Exporters, freight forwarders, carriers, international trade consultants, attorneys, universities, and others who support and advise companies involved in exports. Firms that provide high-tech and/or defense products and engineering services, defense contractors, universities engaged in defense-related applied research, and firms that hire foreign nationals and have collaborative arrangements with foreign companies are subject to U.S. export regulations and would benefit from this seminar.
